Platform and Category mix largely stable, with some early signals to monitor

eVery

everyday for everyone

While relatively even among platforms across years, Walmart shows **slight declining trend**

Vitamin and **Mineral** form the backbone of our business, at close to a third of our annual revenue

Annual Revenue by Platform

Revenue Mix by Category

= ~33%

Canada provides a steady foundation while UK signals concerns and USA presents opportunity

eVery

everyday for everyone

Canada remains as our **most consistent and key revenue driver**, while UK and USA show fluctuations across the years

UK is experiencing an **overall downward trend in demand**, with some signs of slight recovery in Q1 2025 so far → need to monitor further

USA shows a relatively flat demand but **a clearer upward trend in its revenue**

Annual Revenue by Region

Annual Volume by Region

Seeking ways to improve our UK market's performance remains our top near-term focus

UK: Mineral's revenue performance lags volume, signalling potential pricing pressure

Revenue Mix by Category

Q1'25

Volume by Category

Mineral is UK's top-selling product category in Q1 2025, but falls behind Vitamin in terms of revenue: 18.8% of total volume vs 16.9% of total revenue → -1.9%

UK: Re-evaluate pricing & discount strategy as effectiveness varies across

Mineral's volume performance in relation to its discount strategy

Q1'25

Relationship between Discount and Volume

Slight negative correlation exists between discount applied and number of units sold for **Mineral** → suggests that discounts are not effectively driving incremental volume and top-line performance

Recommendations:

FY 2024

Relationship between Discount and Volume

- 1 Reduce discounts within the **Mineral** category as discounting do not show positive top-line results
- 2 Re-evaluate the pricing and discount strategies across categories and platforms, prioritising revenue conversion

UK: Target high-value categories to accelerate top-line growth

eVery

everyday for everyone

Revenue Mix by Category

Fat Burner has gained momentum in UK, reaching 8.4% of Q1'25 revenue (vs ~5-6+% in previous years)

Performance ranks outside the top volume categories, but is the 3rd largest revenue contributor in Q1'25

Recommendations:

- 3 Prioritise investment in high-value categories (e.g. Fat Burner and Performance) to accelerate revenue growth and recovery in UK

Fat Burner:

+1.7% value

Performance:

+3.3% value
